

A  
Project Report  
On

## **“Online Shopping”**

Submitted to

**Bharati Vidyapeeth  
(Deemed to be University), Pune, India**

In partial fulfillment of the requirement of

**BACHELOR OF COMPUTER APPLICATION (BCA –III SEM-VI)**

**2021 –22**

Submitted By

**Mr.Patil Aniket Sanjay.  
Mr.Gholap Dhiraj Dhanaji.  
Mr.Ambekari Aftab Rajjak.**

Under the Guidance of

**Prof. P.R. Rasal**

Through

**THE DIRECTOR**

**Bharati Vidyapeeth  
(Deemed to be University), Pune**

**Yashwantrao Mohite Institute of Management, Karad  
2021-22**

**Bharati Vidyapeeth  
(Deemed to be University), Pune**

**Yashwantrao Mohite Institute of Management, Karad**

---

## **Certificate**

This is to certify that project entitled “**Online Shopping**” submitted by **Mr.Aniket Patil, Mr.Dhiraj Gholap and Mr.Aftab Ambekari** in partial fulfilment of requirement **Bachelor of Computer Application (BCA-III, SEM-VI)** program for academic year 2021-22.

To the best of my knowledge and belief this is their original work and not submitted earlier, anywhere for any purpose.

**Date:**

**Place:** Karad

**Director**

**(Dr. Ravindra Marathe)**

**Bharati Vidyapeeth  
(Deemed to be University), Pune**

**Yashwantrao Mohite Institute of Management, Karad**

---

## **Certificate**

This is to certify that project entitled “**Online Shopping**” submitted by **Mr.Aniket Patil, Mr.Dhiraj Gholap and Mr.Aftab Ambekari** in partial fulfilment of the requirement **Bachelor of Computer Application (BCA-III, SEM-VI)** program for the academic year 2021-22.

To the best of my knowledge and belief, this is their original work and not submitted earlier, anywhere for any purpose.

**Date:**

**Place:** Karad

**Project Guide**

**(Prof. P.R. Rasal)**

**HOD**

**(Dr. R.J.Jadhav)**

**Bharati Vidyapeeth  
(Deemed to be University), Pune**

**Yashwantrao Mohite Institute of Management, Karad**

---

## **Certificate**

This is to certify that project entitled “**Online Shopping**” submitted by **Mr.Aniket Patil, Mr.Dhiraj Gholap and Mr.Aftab Ambekari** in partial fulfillment of requirement **Bachelor of Computer Application (BCA-III, SEM-VI)** program for the academic year 2020-21.

To the best of my knowledge and belief, this is their original work and not submitted earlier, anywhere for any purpose.

Place: Karad

**External Examiner**

# DECLARATION

---

To,  
The Director,  
Bharati Vidyapeeth  
(Deemed to be University), Pune  
Yashwantrao Mohite Institute of Management,  
Malkapur, Karad.  
Respected Sir,

We hereby declare that the project report entitled “**Online Shopping**” Written and submitted under the guidance of **Prof. P.R. Rasal** is a genuine record of our own work. The matter collected in this report is not reproduction from any source. We understand that any such copying is liable to be punished by the rules of the university.

**Date:-**

**Place:-**Karad

**Mr.Patil Aniket Sanjay.**  
**Mr.Gholap Dhiraj Dhanaji.**  
**Mr.Ambekari Aftab Rajjak**

# ACKNOWLEDGEMENT

---

We extend our sincerest gratitude to respected teacher **Prof.P.R.RASAL** under whose supervision and direction this project is undertaken. He is the guiding force and prime inspiration to lift us from the initialization state to the successful completion of the project.

His friendly guidance and discussion over the complexities of a real time project have invoked a deep thought in us. He solved all our problems and queries related to the project.  
He made our project more meaningful.

Undertaking a project such as this places an equal if not greater pressure on friends and family members close to us. Our Chemistry made it more simpler to learn. So we are thanking to each other in our team.

Thanks to all those who helped us in one-way or other, and to all whose names are mentioned.

**“ONLINE  
SHOPPING”**

# Preface

---

## **Online Shopping Project in PHP :**

**Online Shopping** has spread into every corner of the world where Internet is easily accessible. However, online shoppers need to have a credit or debit card in order to make purchases online.

One third of people that shop online use a search engine such as Google.com to find what they are looking for and about one fourth find websites by word of mouth. Despite the recent economic downturn, there is still a growing trend of online shoppers as they are looking for cheaper products to purchase online. Online shoppers tend to be price sensitive. Online retailers are vying with their competitors by slashing prices especially during Christmas and New Year season. This in turn brings about benefits to online shoppers and helps to turn onlookers into buyer.

# **INFORMATION ABOUT PROJECT**

The project titled “ONLINE SHOPPING” is designed using PHP and MySQL at the backend and CSS, HTML, JAVASCRIPT at the frontend. It is a website which can be used for posting information. A teacher can register, post information.

## **1.Admin:**

Admin can create a notice and the people whoever can access it.

## **2.Registered user (Teachers and Students):**

A user can register using his/ her first name, last name, email id, password,class. Admin can registered using name, email id password.

## **3.User:**

User can view all notices.

## **Project Category**

This project uses RDBMS (SQL, PHPMYADMIN) at the backend to create and manage databases.

PHP has been used to for server side scripting and HTML, CSS and Javascript has been used to develop the frontend part of the portal.

## **Tools/Platform**

The tools required to make this project are:

XAMPP or WAMPP for establishing localhost

Notepad++ or similar editor for writing code.

A computer with windows or linux installed. In case of linux, apache2, sql server, phpmyadmin and php have to installed before starting the project

## **SOFTWARE AND HARDWARE REQUIREMENTS**

This section describes the software and hardware requirements of the system

### **SOFTWARE REQUIREMENTS**

- Operating system- Windows 10 is used as the operating system as it is stable and supports more features and is more user-friendly

- Database MYSQL-MYSQL is used as database as it easy to maintain and retrieve records by simple queries which are in English language which are easy to understand and easy to write.

- Development tools and Programming language- HTML is used to write the whole code and develop webpages with CSS, java script for styling work and PHP for sever side scripting.

## **HARDWARE REQUIREMENTS**

Intel core i3 7<sup>th</sup> generation is used as a processor because it is fast than other processors and provide reliable and stable and we can run our pc for long time. By using this processor, we can keep on developing our project without any worries.

Ram 4 GB is used as it will provide fast reading and writing capabilities and will in turn support in processing.

Software Requirement Specification (SRS)

## **MODULES USED**

- \*Login Module
- \*Users Module
- \*Admin Module
- \*Register Module

## **Objective**

To build a website in particular domain the main objective of this project is to help students get notice and information easily. Some of the important features are listed below-The main objective of this project is to find the decreased time difference in student before implementing and after implementing. Our website provide teachers to information regarding in form notice and it Information sorted by date which will displayed in home page which can be sorted by class. To access it first user have to register then they have to log-in.

Database is created in which the user's registration and other details are saved.

## **Introduction**

In computer science, web development is used for making things more easier in different way. Web application development is the process and practice of developing web applications. Web applications are business strategies and policies implemented on the Web through the use of User, Business and Data services.

## **Purpose**

The main purpose of this project is to help people from different places to interact and gain knowledge about anything they want by posting new queries on this website.

## **Definitions of Terms**

**Discussion:** short method to post query or solve problem which increase thinking ability and is required in every field of study.

### **Login:**

Login contain email-id , password of user available which in database.

### **User page:**

The user can access them and can read and view all notices if and only if the user has been logged in.

### **Admin page:**

In this project there is a unique panel “admin panel” which only admin can access it in that panel there are many options available such as edit profile, create notice, view all notice, log out.

### **Register page:**

User can register using first name, last name, email, password, class.

Admin can register using name, email, password.

## **Website Features:**

- (i) Login Interface: User should enter the email id and password to get access to its profile.
- (ii) Users Interface: User will be able to see all the notices sorted by class.
- (iii) Record Interface: It will show the details of posts are recorded in database.

## **Advantages**

- 1 Easy to understand and implement.
- 2 Testing in each phase.
- 3 Documentation available after each phase.

## **Disadvantages**

- 1 Very difficult to manage changes between the phases there are possibility of blocking which can slow down the productivity and efficiency of the process.
- 2 Risk is not addressed in this model.

# Introduction about PHP

## What is PHP

PHP is an open-source, interpreted, and object-oriented scripting language that can be executed at the server-side. PHP is well suited for web development. Therefore, it is used to develop web applications (an application that executes on the server and generates the dynamic page.).

PHP was created by Rasmus Lerdorf in 1994 but appeared in the market in 1995. PHP 7.4.0 is the latest version of PHP, which was released on 28 November. Some important points need to be noticed about PHP are as followed:

- PHP stands for Hypertext Preprocessor.
- PHP is an interpreted language, i.e., there is no need for compilation.
- PHP is faster than other scripting languages, for example, ASP and JSP.
- PHP is a server-side scripting language, which is used to manage the dynamic content of the website.
- PHP can be embedded into HTML.
- PHP is an object-oriented language.
- PHP is an open-source scripting language.
- PHP is simple and easy to learn language.
- 

## PHP Features

PHP is very popular language because of its simplicity and open source. There are some important features of PHP given below:

## **Performance:**

PHP script is executed much faster than those scripts which are written in other languages such as JSP and ASP. PHP uses its own memory, so the server workload and loading time is automatically reduced, which results in faster processing speed and better performance.

## **Open Source:**

PHP source code and software are freely available on the web. You can develop all the versions of PHP according to your requirement without paying any cost. All its components are free to download and use.

## **Familiarity with syntax:**

PHP has easily understandable syntax. Programmers are comfortable coding with it.

## **Embedded:**

PHP code can be easily embedded within HTML tags and script.

## **Platform Independent:**

PHP is available for WINDOWS, MAC, LINUX & UNIX operating system. A PHP application developed in one OS can be easily executed in other OS also.

## **Database Support:**

PHP supports all the leading databases such as MySQL, SQLite, ODBC, etc.

## **Error Reporting -**

PHP has predefined error reporting constants to generate an error notice or warning at runtime. E.g., E\_ERROR, E\_WARNING, E\_STRICT, E\_PARSE.

## **Loosely Typed Language:**

PHP allows us to use a variable without declaring its datatype. It will be taken automatically at the time of execution based on the type of data it contains on its value.

## **Web servers Support:**

PHP is compatible with almost all local servers used today like Apache, Netscape, Microsoft IIS, etc.

### **Security:**

PHP is a secure language to develop the website. It consists of multiple layers of security to prevent threats and malicious attacks.

### **Control:**

Different programming languages require long script or code, whereas PHP can do the same work in a few lines of code. It has maximum control over the websites like you can make changes easily whenever you want.

### **A Helpful PHP Community:**

It has a large community of developers who regularly updates documentation, tutorials, online help, and FAQs. Learning PHP from the communities is one of the significant benefits.

### **Web Development**

PHP is widely used in web development nowadays. PHP can develop dynamic websites easily. But you must have the basic the knowledge of following technologies for web development as well.

- HTML
- CSS
- JavaScript
- Ajax
- XML and JSON
- jQuery

### **PHP Form**

We can create and use forms in PHP. To get form data, we need to use PHP superglobals \$\_GET and \$\_POST.

The form request may be get or post. To retrieve data from get request, we need to use \$\_GET, for post request \$\_POST.

### **PHP Get Form**

Get request is the default form request. The data passed through get request is

visible on the URL browser so it is not secured. You can send limited amount of data through get request.

Let's see a simple example to receive data from get request in PHP.

File: form1.html

```
<form action="welcome.php" method="get">
Name: <input type="text" name="name"/>
<input type="submit" value="visit"/>
</form>
```

File: welcome.php

```
<?php
$name=$_GET["name");//receiving name field value in $name variable
echo "Welcome, $name";
?>
```

### **PHP Post Form**

Post request is widely used to submit form that have large amount of data such as file upload, image upload, login form, registration form etc.

The data passed through post request is not visible on the URL browser so it is secured. You can send large amount of data through post request.

Let's see a simple example to receive data from post request in PHP.

File: form1.html

```
<form action="login.php" method="post">
<table>
<tr><td>Name:</td><td> <input type="text" name="name"/></td></tr>
<tr><td>Password:</td><td> <input type="password"
name="password"/></td></tr>
<tr><td colspan="2"><input type="submit" value="login"/> </td></tr>
</table>
</form>
```

File: login.php

```
<?php
$name=$_POST["name");//receiving name field value in $name variable
$password=$_POST["password");//receiving password field value in $password
variable
```

```
echo "Welcome: $name, your password is: $password";  
?>
```

## PHP MySQL Connect

**mysql\_connect()** extension is *deprecated*. Now it is recommended to use one of the 2 alternatives.

- **mysqli\_connect()**
- **PDO::\_\_construct()**

---

### PHP mysqli\_connect()

PHP **mysqli\_connect()** function is used to connect with MySQL database. It returns *resource* if connection is established or *null*.

#### Syntax

```
resource mysqli_connect (server, username, password)
```

### PHP mysqli\_close()

PHP **mysqli\_close()** function is used to disconnect with MySQL database. It returns *true* if connection is closed or *false*.

#### Syntax

```
bool mysqli_close(resource $resource_link)
```

## HTML

The major points of HTML are given below:

- HTML stands for HyperText Markup Language.
- HTML is used to create web pages and web applications.
- HTML is widely used language on the web.
- We can create a static website by HTML only.
- Technically, HTML is a Markup language rather than a programming language.

## HTML Tags

HTML tags are like keywords which defines that how web browser will format and display the content. With the help of tags, a web browser can distinguish between an HTML content and a simple content. HTML tags contain three main parts: opening tag, content and closing tag. But some HTML tags are unclosed tags.

When a web browser reads an HTML document, browser reads it from top to bottom and left to right. HTML tags are used to create HTML documents and render their properties. Each HTML tags have different properties.

An HTML file must have some essential tags so that web browser can differentiate between a simple text and HTML text. You can use as many tags you want as per your code requirement.

- All HTML tags must enclosed within < > these brackets.
- Every tag in HTML perform different tasks.
- If you have used an open tag <tag>, then you must use a close tag </tag> (except some tags)

---

### Syntax

<tag> content </tag>

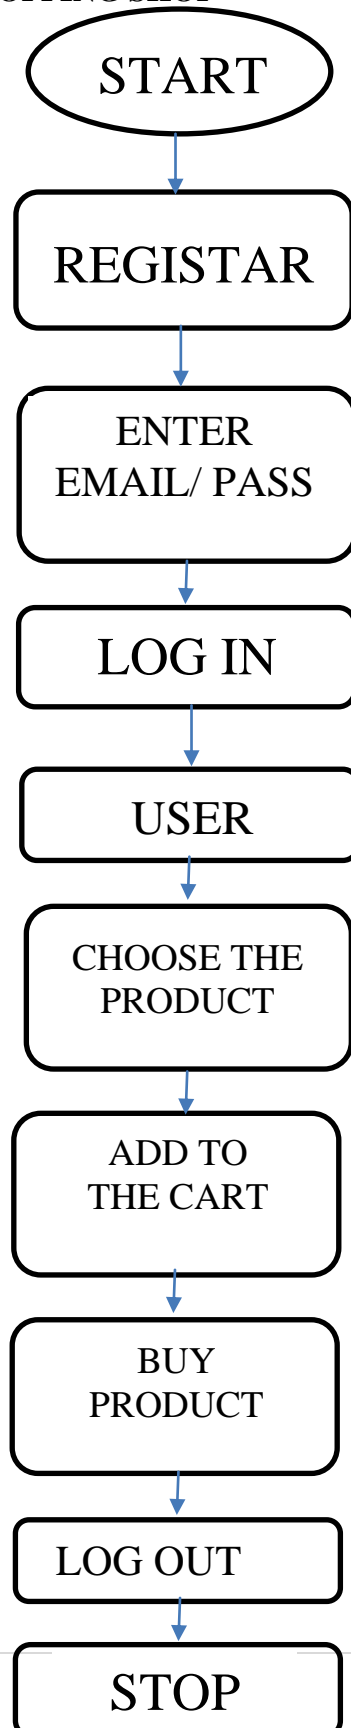

### CSS

- CSS stands for Cascading Style Sheet.
- CSS is used to design HTML tags.
- CSS is a widely used language on the web.
- HTML, CSS and JavaScript are used for web designing. It helps the web designers to apply style on HTML tags.

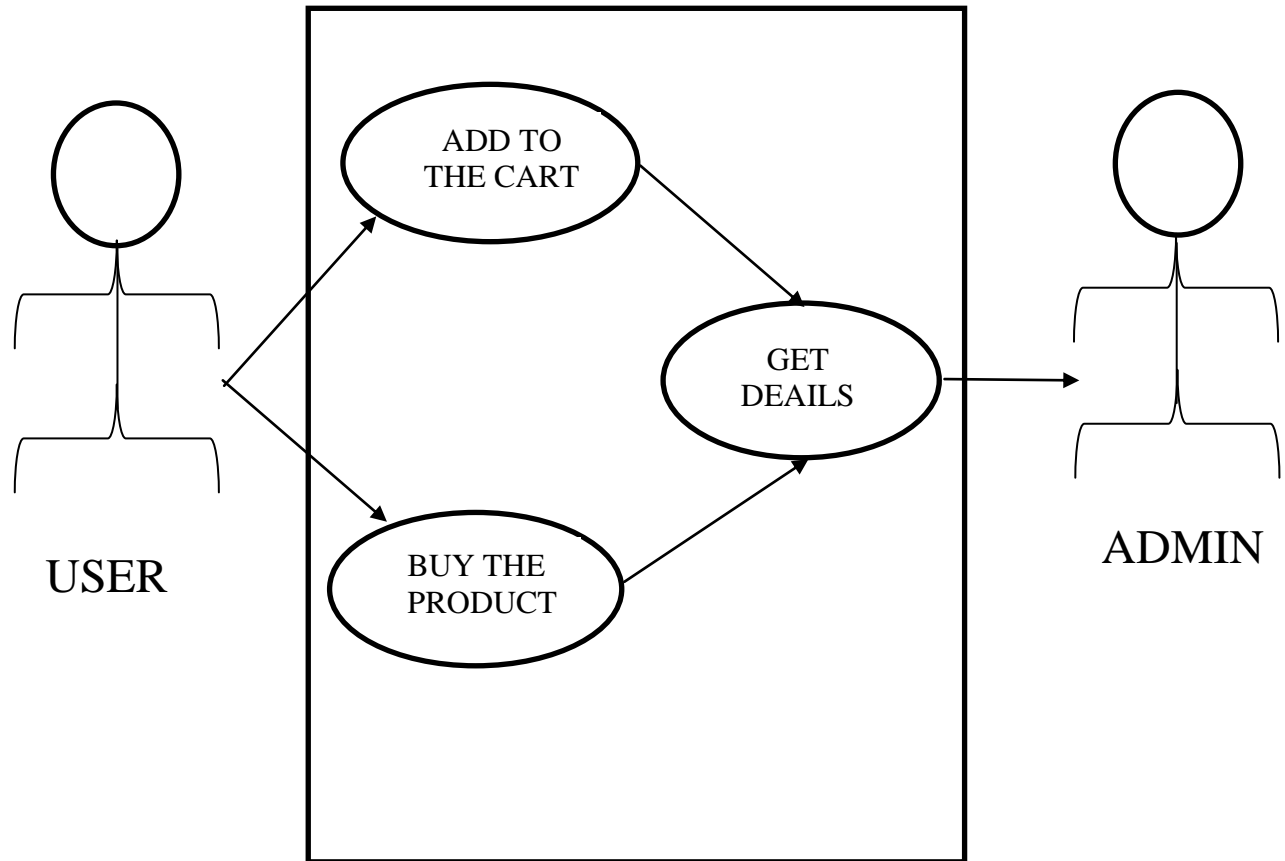

# FLOWCHARTS

It shows the flow of data from one module to another so as to make working clear in project

Flowchart of **ONLINE SHOPPING SHOP**

## OUTPUT :-

The screenshot displays a web browser window with the following elements:

- Browser Tabs:** 'localhost / 127.0.0.1 | phpMyAdmin' and 'Projectworlds Store'.
- Address Bar:** 'localhost/ONLINE/signup.php'.
- Navigation Bar:** Includes 'I Store' and links for 'Sign Up' and 'Login'.
- SIGN UP Form:**
  - Fields: Name, Email, Password(min. 6 characters), Contact, City, Address.
  - Submit Button: 'Sign Up'.
- Footer (Dark Background):**
  - Copyright © Aniket Patil , Aftab Ambekani & Dhiraj Gholap Store. All Rights Reserved.
  - contact info:
    - +91 702-046-3746
    - +91 778-287-0909
    - istore.mh50@gmail.com
    - Karad , Maharashtra - 415110
  - follow us:
    - facebook twitter instagram linkedin
- Taskbar:** Displays various application icons and system status (ENG IN, 03:33 PM, 04-06-2022).

# DATABASE DESIGN

The purpose of database is to handle information as integrated whole. A database is a collection of interrelated data stored with minimum redundancy to serve may users quickly and effectively. After designing input and output, the analyst must concentrate on database design on how data should be organized around user requirements. The general objective is to make information access easy, quick, inexpensive and flexible for other users. During database design following objective are concerned-

- (i) Controlled Redundancy
- (ii) Data Independence
- (iii) Accurate and Integrating
- (iv) Recovery from failure
- (v) Privacy and Security
- (vi) Ease of learning and use

## **PROJECT SUMMARY**

Hopefully you are satisfied after using our project. And might be you found that it is very simple to use. This project is very applicable in day to day life. It reduces manual efforts.

Hopefully we succeed to fulfill following objectives.

- 1) User Friendly.
- 2) To convert existing manual system into computerized system
- 3) Enjoying use of project.

# BIBLIOGRAPHY

Here I would like to mention about the sources of information in due course of writing the project report & would like to state that the information obtained through different presentation & projects of seniors has greatly contributed to the successful completion of the project.

The list of different sources is mentioned

below. 1. WWW.javapoint.com

2. www.w3school

s.in 3. Lecture

Notes 4. Google

5. PHP SQL BOOK

6. YouTube

## **Books:**

1. The Complete Reference Java by Herbert Schildt (Tata McGraw-Hill)
2. Head First Java by Kathy Sierra & Bert Bates.

## **LIMITATIONS**

- You can't touch the product.
- You cannot bargain.
- Returning the product.
- Online shopping save money

## **FUTURE SCOPE**

Today with the high penetration of the internet and mobile devices – currently there are about 776.45 million internet connections in India – it has also become very easy to buy and sell online.

Online selling and purchasing offer innumerable benefits to both sellers and buyers, and these advantages are also the reasons for the rising scope of eCommerce.

## CONCLUSION

In conclusion, Online stores do not have space constraints and a wide variety of products can be displayed on websites. It helps the analytical buyers to purchase a product after a good search.

1. Saves time and efforts.
2. Convenience of Shopping at home.
3. Wide variety / range of products are available.
4. Good discounts / lower prices.
5. Get detailed information of the product.
6. We can compare various models / brands.
